1 Verb (action) first, noun (object) second

1. Current design: Choose action first, then object.

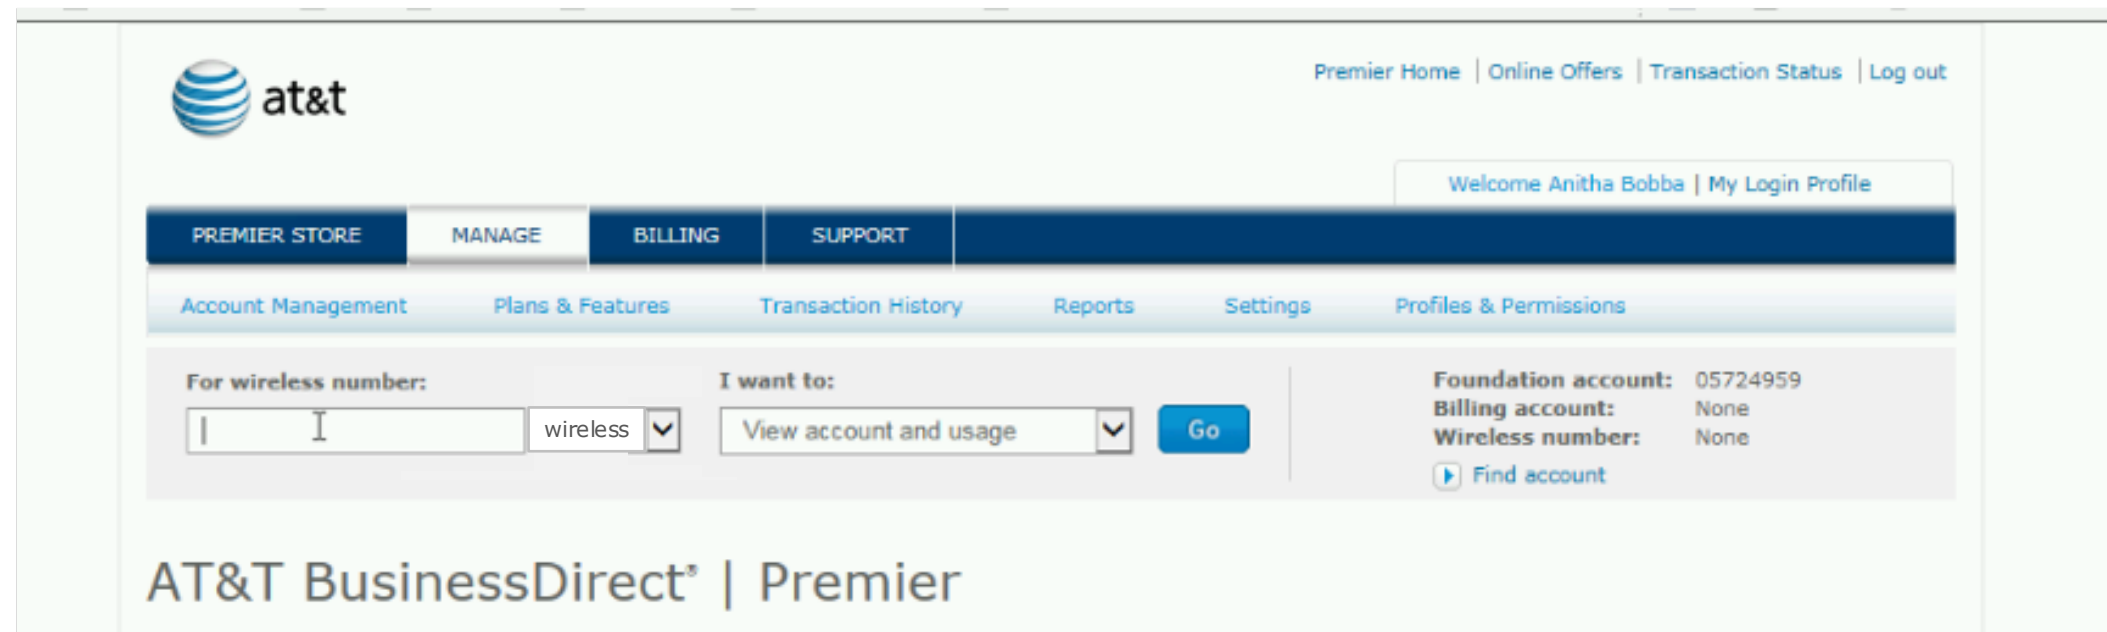

2 Noun (object) first, verb (action) second

2. Proposed design: Object first, then choose Action.

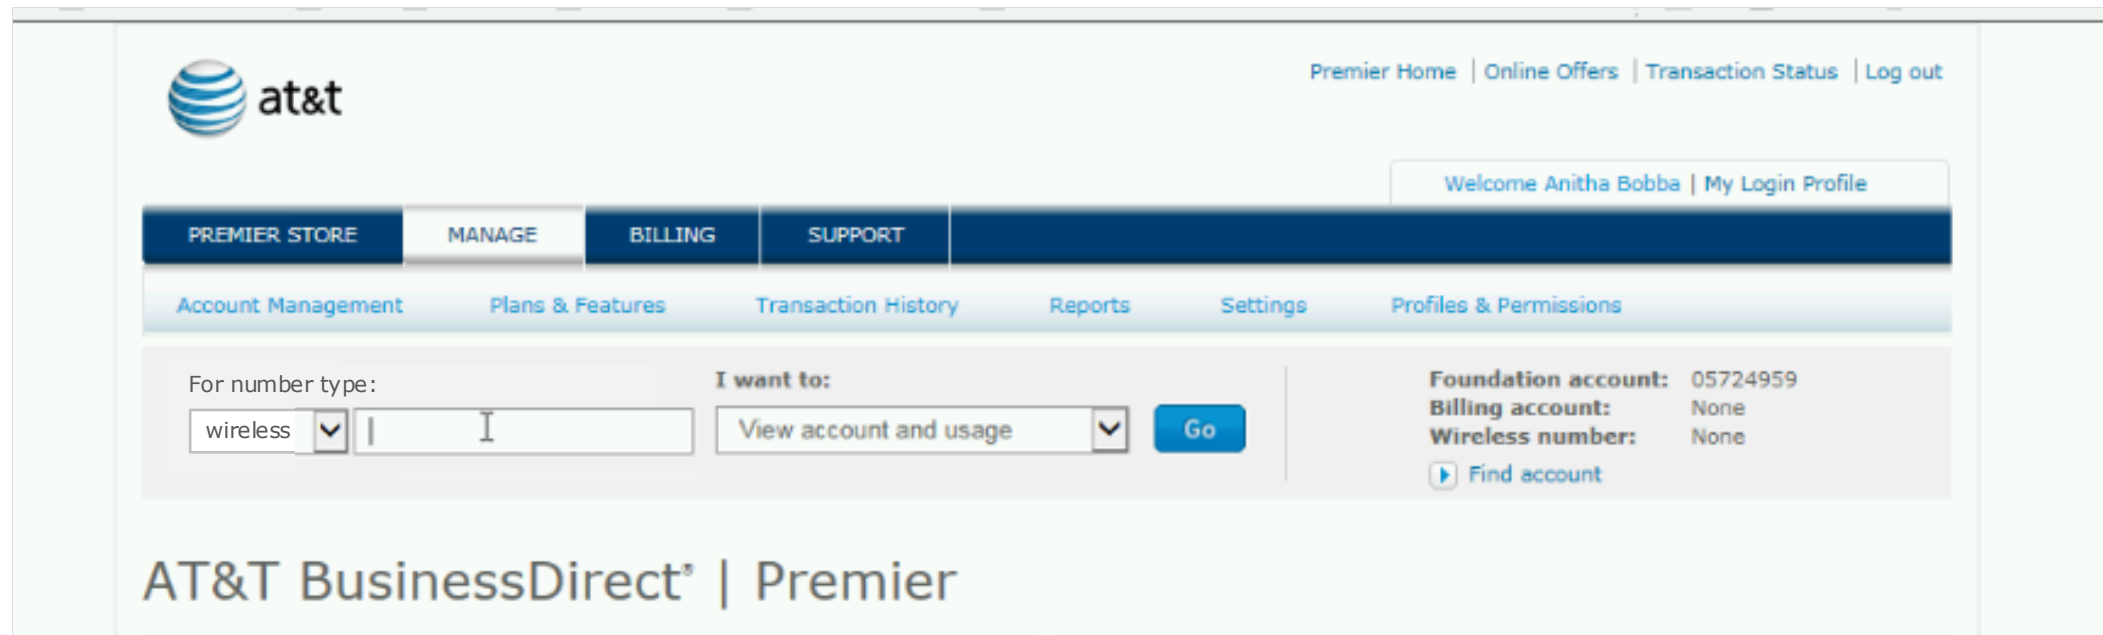

3. Proposed design: Choose object type first, then choose action.

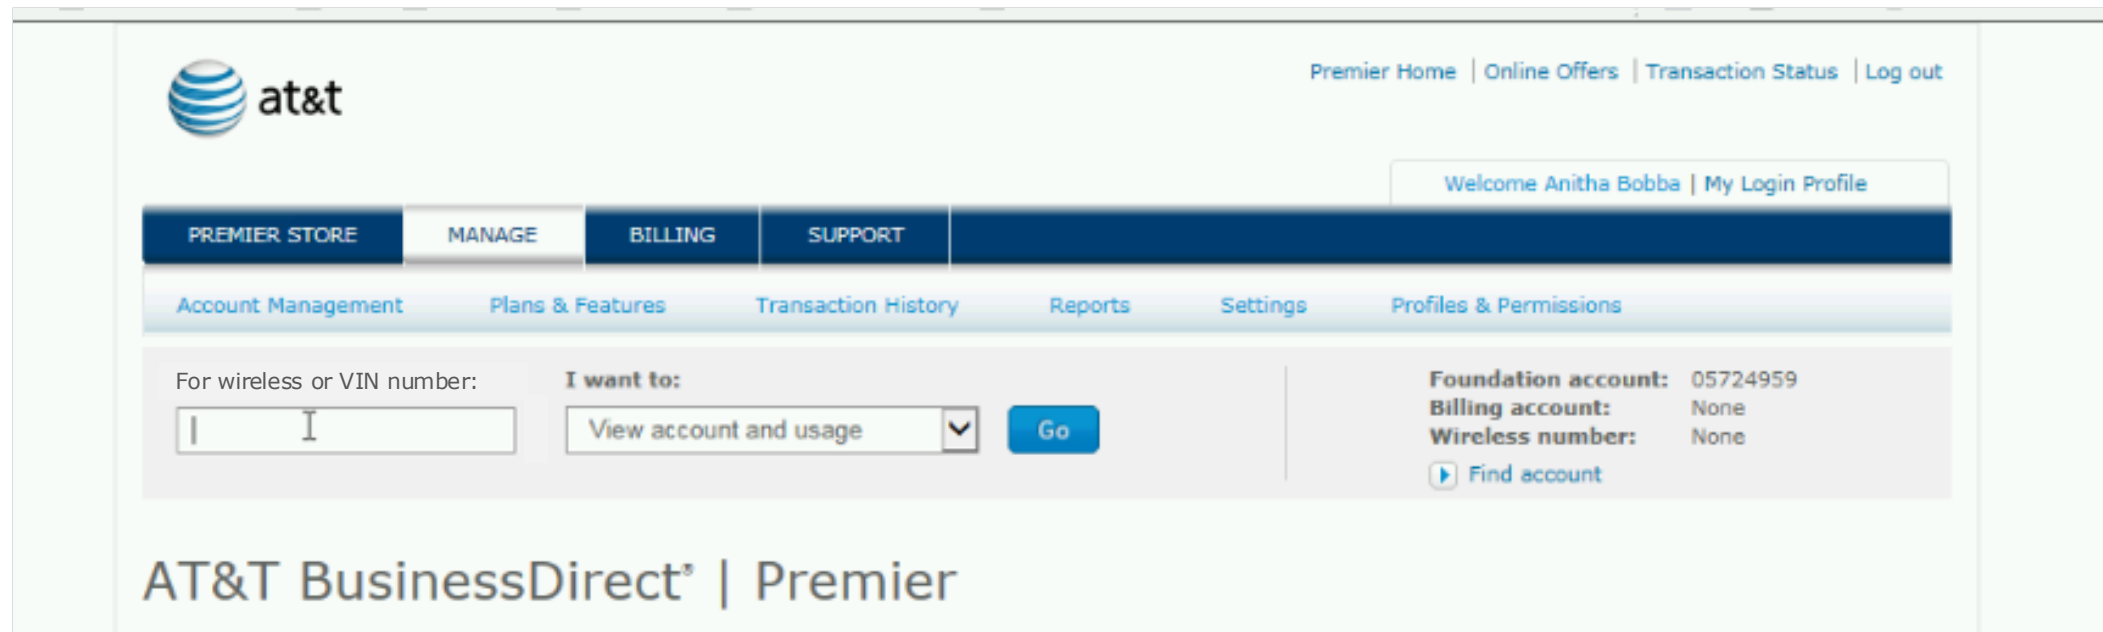

4. Proposed design: Choose object first with pulldown, then choose action.

This design is used on mobile devices and contact forms. It also provides robust flexibility for future number options.

5. Proposed design: Choose object first with pulldown menu at left, then choose action.

This design is used on mobile devices and contact forms. It also provides robust flexibility for future number options.

6. Proposed design: Text field programmed to detect valid CTN or VIN.

Apple Contacts app

Text fields have pull down data type options at left

The image shows a contact card for "John Smith" in the Apple Contacts app. The card is divided into several sections, each with a pull-down menu on the left to select the data type. The fields and their current values are:

- Name:** John Smith (The "Smith" part is highlighted with a selection box).
- Organization:** Company (with a checkbox).
- Phone:** mobile (425) 420-1234 (Type: iPhone).
- Email:** home (Type: Email).
- Ringtone:** ringtone (Type: Opening).
- Text Tone:** texttone (Type: Note).
- Home Page:** home page (Type: URL).
- Birthdate:** birthday (Type: Month/Day/Year).
- Related Name:** mother (Type: Related Name).
- User Name:** home (Type: User Name AIM).
- Address:** home (Type: Street, City, State, ZIP, Country).
- Note:** note.
